

INTEGRATED MANAGEMENT SYSTEMS POLICY

Piomak Group is an organization offering engineering and contracting solutions in line with the changing demands and rising expectations,

Having adopted sharing the knowledge with users, providing quality services and prioritizing customer satisfaction as principles, Piomak aims to be an industry leader.

The company has established and maintains its Integrated Management System around the principles of:

- Predicating on quality service,
- Producing effective, technological and advanced solutions,
- Considering and maintaining customer satisfaction as a core principle,
- Acting in strict compliance with the applicable Laws and Regulations,
- Considering our customers and employees as a source of existence,
- Meeting the requirements of and continuously improving the Quality, Environmental, Occupational Health and Safety System,
- Identifying, and setting and applying protective parameters for and against, the health and safety risks likely to arise from the activities with a view to create a safe work environment,
- Organizing training activities targeting employees, suppliers and sub-contractors in order to ensure them to comply with the occupational health and safety practices,
- Determining environmental aspects, identifying and updating types of, and harms likely to be related to, environmental impact,
- Preventing pollution by taking the actions necessary to minimize the amount of the wastes as a result of our activities and the consumption of natural resources ,
- Considering the Risks and Opportunities with regard to all activities of the company and systematically establishing a prevention culture within the company and
- Sharing this approach and priorities of us with the public and other interest groups.

The company personnel performing their duties around and acting with the awareness of these principles is vital for the efficient maintenance of the management systems that we have established.
